Summary

WordPress Developer building fast, conversion-focused websites for service-based businesses and agencies. I handle everything from custom Elementor/Divi builds to server deployment, domain management, and technical SEO — plus backend automation with Python and n8n to cut manual workflow time. Comfortable owning a project end-to-end, from hosting setup to launch.

Experience

Archers Contact Solutions — Dasmarinas, Cavite
Website Developer — 2024 – 2026
Manage in-house and client WordPress projects end-to-end — from server and domain setup to custom HTML, CSS, JavaScript, and PHP development. Handle technical SEO across 10+ sites, with a focus on page speed, rankings, and traffic growth. Also responsible for VPS and shared hosting configuration and ongoing deployment

Global Sleepcare Centre — Makati City, Metro Manila
Website / IT Admin — 2025
Administered three WooCommerce e-commerce sites as part-time IT/Website Admin, covering backend maintenance, SEO, and site optimization. Integrated Jotform across sites to streamline patient intake and lead capture, reducing manual data entry. Supported day-to-day e-commerce operations and performance monitoring
